

CORDLESS WET/DRY VACUUM

This product is designed using the following criteria:

FLEXIBILITY – EASE OF OPERATION – MODULAR CONSTRUCTION - SAFETY

The unit is flexible by allowing quick and easy vacuuming on an immediate need basis without the necessity of a power cable connection.

Each unit comes standard with an on board battery charger (photo 2) that can be plugged in anywhere where a power outlet is available. The strong cast alloy squeegee allows maximum coverage for water suction/removal (photo 1).

The use of large back wheels allows maximum manoeuvrability to reach any area with a minimum of effort.

A visual indication of battery levels as well as the main switch is easily accessible on the control panel to allow easy access/viewing for the operator. The machine has a protection for the batteries that automatically disconnects them upon reaching a certain charge level.

The unit has two types of batteries.

Macchine Professionali Lavapavimenti

Technical details:

- Voltage 24V/DC
- Vacuum motor 24V/550W
- Batteries 2/12V/75A
- Runtime 3-3.5 hours
- Battery charger 24V/8A on board
- Water lift mm.H2O 1300
- Sound level 65 dbA
- Dry Yes
- Wet Yes
- Air flow 32 lt/sec.
- Capacity 50 lt.
- Weight 25 kg.
- Batteries weight 39 kg.
- Frontal squeegee cm. 75
- Dimensions cm. 75x85x100 H.
