

Steam floor washer multipurpose cleaner

The idea to design this machine came up from the need to have a multipurpose professional steam cleaner which can sanitize and clean any type of floor surfaces more easily and efficiently.

Steam cleaners are always provided with a rectangular steam brush to steam floors, generally they are 30cm width and bristled. Operator should attach it to the extension steam tube which is connected to the flexible steam hose and go around the rooms brushing back and force with the effort of his own arms. We thought that if we could combine the steam with a motorized power head brush the efficacy cleaning result would have been multiplied x times.

- The machine can be supplied as complete kit or it can be purchased separately. The floor scriber, sweeper and dryer the steam cleaner .
- At any time both the equipment can be used together and or independently depending on the specific cleaning application. With their own standard and optional accessories it is possible to carry uncountable cleaning applications.
- Here below we list the number of application that is possible to carry on with GIROVAP 35:
 - Floor scrubber
 - Floor sweeper
 - Floor washer and dryer
 - Floor steam washer
 - Wet and dry vacuum cleaner
 - Steam cleaner

GIROVAP35 is ideal for small-medium industrial and commercial business premises; restaurant, hotels, schools, canteens, kitchens, sport centers, swimming pools, food processing lab's, factories, etc. etc.

GIROVAP35 it's MADE in ITALY from :

FLOOR WASHER	GIROVAP35EL	GIROVAP350BT
Floor washer working width	350mm	
Floor washer drying width	710mm	
Recovery Dirty Tank Capacity Liter (Gallon)	25 liters	
Injection solution tank capacity Liter (Gallon) width	13liters	
Power source	230V / 50Hz	24V / D.C.
Power cable length	20 meters	-
Number of rotary brushes	2	
Rotary Brush R.P.M. (Rounds Per Minute)	1000 rpm	
Motor brush power	600 Watts	400 Watts
Vacuum motor-power	600 Watts	550 Watts
Batteries	-	2/12V/60A-gel
Battery pack weight	-	45 Kgs
Dry Weight	55 Kgs	
Dimensions	710x1058x970H. mm.	
Packaging Dimensions	710x1130x1150H. mm.	
Standard color	Dark-Gray	
Main housing materials	High density Polytilene	
STEAM GENERATOR	230V 50Hz	
Boiler (heating element) power	2000 Watts	
Boiler capacity	1,5 liters	
Boiler material	Stainless Steel AISI 304	
Maximum steam pressure	5 bar	
Water refilling tank capacity	1,8 liters	
Detergent tank capacity	1,8 liters	
Power cord lenght (to use as self-independent unit)	8 meters	
Steam production	3,0 Kgs/hr	
Standard color	White	
Housing material	ABS	
Dry Weight	7,5 Kgs
